

Human Reasoning and the Weak Completion Semantics II
Technische Universität Dresden
Exercise 6

Steffen Hölldobler, Meghna Bhadra

June 14, 2022

Problem 1

Please suggest a neural network where the role of modifiers are minimized or eliminated.

Problem 2

Can you think of a function that can be computed by a 3-layered feed forward network of logical threshold units but by a not 2-layered network of logical threshold units?
